# RANDRIAMARO

## JUSLAIN FABIO

**CYBERSECURITY & NETWORK ENGINEERING**

SOC ANALYSIS • SECURE SYSTEMS • SOFTWARE & AI PROJECTS

## CAREER FOCUS

- Cybersecurity & SOC
- Network Engineering
- Secure Systems
- AI-Assisted Analysis

## EDUCATION

**MASTER IN TELECOMMUNICATIONS** | 2024 - Present
University of Itasy

**BACHELOR IN COMPUTER SCIENCE** | 2021 - 2024
University of Itasy

**BACCALAUREATE** | 2020
LTP Ampasampito

## TRAINING

**Cybersecurity**
Orange Digital Center (ODC), 2025

**Embedded Systems**
TME Education, 2023

**IT Maintenance**
Nir'Info, 2020

**Computer Networking**
Nir'Info, 2020

**Network Administration**
Nir'Info, 2020

## LANGUAGES

**Malagasy**
**French**
**English**

## CORE STRENGTHS

- Analytical thinking
- Problem solving
- Attention to detail
- Team collaboration
- Adaptability
- Technical curiosity
- Continuous learning

## PROFILE

Computer Science graduate and Master's student in Telecommunications at the University of Itasy, combining a strong foundation in networking with hands-on cybersecurity and software projects. Practical exposure includes SOC-oriented security monitoring, network administration, ransomware analysis, and AI-assisted fact-checking. Particularly motivated by roles where security, infrastructure and technology meet - with a strong focus on learning quickly, solving technical problems and delivering reliable solutions.

**PROFILE VALUE:** Cybersecurity + networking + practical software/AI projects in one profile.

## PROFESSIONAL EXPERIENCE

**CYBERSECURITY INTERN - SOC ANALYST** | Smartone.ai

- Exposure to Security Operations Center workflows and cybersecurity analysis.
- Built practical skills in security monitoring and incident-oriented analysis.

## SELECTED PROJECTS

**TRUTH CHECKER PLATFORM** | UNESCO Youth Hackathon 2026

- Developed an AI-assisted fact-checking platform focused on evidence collection and automated claim analysis.
- Worked on backend/API integration and LLM-based analysis workflows.

**RANSOMWARE CLEANING & DECRYPTION TOOL** | Bachelor's Thesis - 2024

- Designed a portable Python-based cybersecurity tool for ransomware analysis, cleaning and decryption.
- Combined cybersecurity concepts with practical software development and security problem solving.

**NETWORK MANAGEMENT APPLICATION** | University Project - 2025

- Designed an application focused on monitoring and managing computer network environments.

**SURICATA IDS/IPS SECURITY LAB** | Academic Lab Project

- Configured and tested Suricata on pfSense in IDS/IPS mode with automated alerting.
- Validated detection scenarios including network scanning and malicious-file test activity in a controlled lab.

## TECHNICAL SKILLS

**Networking:** TCP/IP, OSI, IP addressing, subnetting, VLAN, DHCP, DNS, NAT, static routing, MPLS fundamentals, router/switch configuration

**Cybersecurity:** SOC fundamentals, security monitoring, network security, firewall, VPN, LAN hardening, IDS/IPS concepts, Wazuh, Wireshark, Suricata

**Systems:** Windows, Windows Server, Linux (Ubuntu/Debian), VMware, Winbox, PuTTY, pfSense fundamentals

**Development:** Python, backend/API integration, Git/GitHub, software project development

**AI & Emerging Tech:** LLM API integration, AI-assisted analysis workflows, embedded systems fundamentals

**Networking Tools:** Cisco Packet Tracer, GNS3, Nmap

## CERTIFICATION

**ISO 27000** | SkillFront, 2026

**Open to opportunities in cybersecurity, SOC, network engineering, IT systems and secure technology projects.**
